# Order Management Service

## Tally integration

Integration touchpoints

- Product Masters

    - Central definition of masters and uniform synchronization to each distributor location

    - Elements: SKUs, Price, Schemes, Retail outlets, Beats and mapping

- Sales Order

    - Sales orders generated on mobile

    - Orders are made available for import into Distributor's Tally

- Secondary Sales Invoices

    - Invoices generated against the sale orders are exported

    - They are uploaded back to the server for reconciliation

- Expenses

    - Sales rep expenses are posted to Manufacturer's tally as payment vouchers for faster settlement

Architecture

Illustrative scenario for a Manufacturer and their Distribution chain
